

New Jersey's "do not call list" has been a God send. I was harrassed daily by unsolicited vendors to the point I refused to answer my phone. Since the "do not call list" has begun, my life has returned to normal. I can now answer calls from family and friends without the burden of unwanted telemarketing. Our legislature heard our concerns and acted appropriately. This is the way the American system of government is supposed to work. Please support New Jersey's law, do not undo it.
